The award winning team at *Croma Design* take on a slew of high tone interior design projects on a regular basis - they made a splash at the [Interior Design Show](#) earlier this year with their swanky designer space - but their latest endeavour, *Croma Express*, pitches their services at a far more accessible pricepoint. With the idea that luxury should be possible with any budget, *Croma Express* focuses on the kitchen and offers up polished modernism with a modest design fee and affordable Ikea cabinetry. Budgets start at around \$10,000 for a complete kitchen re-do (take a look above at the results of one of their recent projects) and include a design consult, kitchen plan and a cut sheet with suggestions for cabinetry choices, door hardware, countertop, flooring and backsplash. On top of that, *Croma Express* will also refer any trades needed to help hustle your kitchen from dream to reality. For more info click [here](#), and click [here](#) to get inspired by *Croma's* residential portfolio.
